Activate the electrical swiths to put the box in to normal mode. The handle fols down into position.

SLIREJ 650B - With air bellow, an eaier way to put snow chains on.

System 650B

SLIREJ with 650 bracket and air bellow. Is a perfect system when you often have to put snow chains on the driver wheel.

The handle is easily lifted and the distance between the sand spreader and the wheel is increased.

High: 685mm

High:*** 910mm

Depth: 810mm

With from driver wheel and forward: 650mm.

Volume: 90 liter.

Weight box: ** 46kg

Weight bracket 18kg

** Including feeder roller.

*** Open top hatch in model SK and SD.

SLIREJ gravel spreader easily takes you on slippery surfaces. With just a simple push on the electric switch, the gravel spreader is activated and the feed wheel is pushed against the driver wheel and sanding begins.

SLIREJ sanding unit eliminates the risk of sliding to the side, backwards or forwards. This makes it easier to change flatbeds or containers when standing on a bed of gravel. You can then reduce the risk of unnecessary, and perhaps costly downtime, and save a lot of time when you do not have to put on snow chains.

SLIREJ gravel spreaders fit almost all trucks, but are also manufactured for forklifts of various kinds.

SLIREJ gravel spreader is a durable construction and good function. It is a product with small operating costs.
